The Bolin Centre is a multi-disciplinary consortium of over 400 scientists in Sweden that conducts research and graduate education related to the Earth’s climate.

Paul Crutzen – an exceptional researcher

The Nobel laureate Paul Crutzen has passed away. He studied, defended his dissertation and worked with research in meteorology at Stockholm University until the 1970s. In 1995, he was awarded the Nobel Prize in Chemistry for his discoveries about the earth’s ozone layer. During his years in Stockholm, Paul Crutzen worked closely alongside Bert Bolin.

Fungus that eats fungus could help coffee farmers

Coffee rust is a parasitic fungus and a big problem for coffee growers around the world. A study in the birthplace of coffee – Ethiopia – shows that another fungus seems to have the capacity to suppress the rust outbreaks in this landscape.

"Coffee leaf rust is a fungal disease that is a problem for coffee growers around the world. There is a need to learn more about natural solutions instead of just applying pesticides," says Kristoffer Hylander, professor at the Department of Ecology, Environment and Plant Sciences, Stockholm University.

Research places the unusual Swedish summer of 2018 in a climate perspective

Climate researchers from SMHI's Rossby Centre, Stockholm University and Max Planck Institute for Meteorology have studied the probability of another summer resembling the extremely warm Swedish summer of 2018. They confirm, from a historical perspective, this was a very unusual summer. Ongoing climate change has, however, increased the probability of similar summers being experienced.

RA7 seed money 2021

Open call for applications of the 2021 seed money from RA7: landscape processes and climate.
Apply before February 28, 2021!

Read more on the Bolin website »

RA3 seed money 2021

Open call for applications of the 2021 seed money from RA3: Hydrosphere, Cryosphere and Climate
Apply before March 8!

Read more on the Bolin website »

RA5 seed money 2021

RA5 continues an open call for grant proposals on historical to millennium climate variability. Please contact both research area leaders by email (malin.kylander@geo.su.se and frederik.schenk@smhi.se) if you have some ideas or intend to apply.

Visit RA5 on the Bolin website »

Recent Bolin Centre publications

On bolin.su.se/publications you'll find a list of scientific journal publications by Bolin Centre scientists. Here are the most recent ones we have published on the website.

The ClimBEco research school offers a number of courses and workshops each year, including both in-depth disciplinary as well as interdisciplinary curricula. Read more about the courses on ClimBEco’s website » and the Bolin Centre website »

Online course for students, March 1-5

**Webinars on Geomorphology and Quaternary Geology** is a short-term virtual mobility CIVIS course on geomorphology, geomorphological hazards and Quaternary geology that consists of five webinars, 1-5 March, 2021.

The course is open to Bachelor, Master and PhD students with a background in geology, geomorphology and environmental sciences from the CIVIS member Universities as well as external institutions.

Application deadline: 22 February.

For more information, visit Civis' website »

Job opening: person with a background in climate modelling, empirical or statistical downscaling, physical geography, microclimate processes and geographic information systems

We are looking for a person with a background in climate modelling, empirical or statistical downscaling, physical geography, microclimate processes and geographic information systems.

The position will be placed at Stockholm University, but there will be close collaboration with the Rossby Centre at the Swedish Meteorological and Hydrological Institute (SMHI).

During a project on the relationship between climate, pathogens and coffee yield, we have made detailed recordings of the microclimate in southwestern Ethiopia, and we would now like to hire a researcher/postdoc to use the climate logger data to advance insights into how the microclimate in shade coffee farms varies across time and space in the study region. In addition, regional and large-scale climate data from other observational sources, atmospheric re-analysis products and climate models will be used to assess how local climate conditions may change in the future. Finally, we are interested to investigate how such predicted changes in climate may affect coffee yield and diseases.

Please spread the word if you know anyone who may be interested, and feel free email any questions to ayco.tack@su.se

More details can be found on Stockholm University's website »

Job opening: Postdoctoral Fellow in marine hydrogeology/geochemistry/geophysics

This two-year postdoctoral position is part of a larger project investigating the development and dynamics of the marine cryosphere (including ice sheets, glaciers, floating ice tongues, sea ice, and subsea permafrost) and ocean conditions of northern Greenland, with a particular emphasis on the unexplored Sherard Osborn Fjord that connects the Ryder Glacier to the ocean at the southern Lincoln Sea and the northern Nares Strait.

The larger project covers a broad range of disciplines including atmospheric chemistry and physics, archeology, biology, climatology, ecology, genomics, glaciology, oceanography, marine geology, geophysics and geochemistry.

Welcome to review IPCC:s report Mitigation of Climate Change

"Mitigation of Climate Change" is one of three final reports within the IPCC Sixth Assessment Report, AR6. The second draft of this report will be available for expert review until 14 March.

This second review of the report and SPM (Summary for Policy Makers) is conducted by experts and governments and runs from 18 January to 14 March 2021.

Experts need to register, which will be possible until 7 March.

It is not necessary to comment on the entire report. As an expert, you are welcome to focus on the parts in which you have the deepest scientific knowledge.

Please find more information here:
Arctic Avenue Spring Call 2021

The Arctic Avenue Spring Call 2021 is open. Application **deadline is 19 February 2021**. Calls are also planned for autumn 2021. Welcome with your application!

OTHER EVENTS AND INFORMATION

22-23 Feb
Virtual workshop on Values, Choices and Uncertainties in Climate Modelling
Organised by an interdisciplinary team of researchers at Stockholm University and KTH, we will bring together scientific and philosophical expertise with a range of short key-note talks by Andrew Gettelman, Gabi Hegerl, Ted Shepherd, Erica Thompson, Matt Brown, and Wendy Parker, followed by in-group discussions with a limited number of participants. The workshop will be on two consecutive half-days. Read more and register on Dept. of Meteorology's website »

22 Apr
Stockholm University Sustainability Forum 2021
The Sustainability Forum – Hållbarhetsforum – is a recurring event at Stockholm University where people can meet, build networks, and create collaborations for sustainable development. The third Sustainability Forum will be held on 22 April on the theme “From crisis to sustainability”. Read more on Stockholm University’s website »

17-19 Aug
Geological Society of Sweden - 150 years anniversary meeting
In 2021 it is 150 years since the Geological Society of Sweden was founded. To commemorate this, a meeting will be held in Uppsala 17–19 August 2021. The meeting is open to all geoscientist that are active in Sweden or have an interest in Swedish geoscience. Deadline for abstract submission: April 30 Deadline for registration: July 30 Venue: Department of Earth Sciences, Uppsala University and the Geological Survey of Sweden, close to the city centre. Read more on Department of Geological Science's website »

OFFICE STAFF - BOLIN CENTRE AT CAMPUS

Due to COVID-19, the Bolin Centre Office will be irregularly staffed at the University. Like many of you, we work from home. Don't hesitate to get in touch with us via mobile or e-mail.

- Magnus: 076-695 70 78, magnus.atterfors@su.se (Communications)
- Annika: 072-148 91 49, annika.granebeck@su.se (Coordination)
- Laila: laila.islamovic@su.se (Communications & coordination during the spring)
- Eva: 076-650 03 08, eva.gylfe@su.se (Supports the office part-time during the spring).

The Bolin Centre Weekly News provides you with a selection of our current activities and latest news and is sent to all members of the Bolin Centre. If you have suggestions that you would like to include or research that you would like to share in coming Weekly News, please contact bolin@su.se.
