The Bolin Centre is a multi-disciplinary consortium of over 400 scientists in Sweden that conducts research and graduate education related to the Earth's climate.

The CRS/ClimBEco side event during the Swedish Climate Symposium has been rescheduled!

Take the chance to meet other PhD students working in climate research. The Climate Research School together with ClimBEco Research School in Lund are organizing a side event during the symposium. On **18 May**, we will meet in the morning for scientific presentation and discussions, a great way to disseminate your research and meet fellow students. We will conclude the event with climbing, networking and playing in the trees at the beautiful Sörsjön Adventure park. And best of all - it's free!

**Registration deadline:** March 18, 2022

**Webinar: Challenges for handling spatial data across disciplines – examples from different research fields**

Spatial data is more and more available to all kinds of researchers and in society. At the same time Geographic Information System (GIS) software have become increasingly spread and easier to handle. Methods and data within one field can be useful in other disciplines. This makes it possible to answer new research questions and also requires us to think more carefully about the potential use of research data in various fields and across different disciplines.

The webinar will present some examples from Archaeology and Earth System Science. There will also be a presentation of results from a survey where researchers in Sweden, who work with spatial data in different disciplines, give us their view on data management, including how to make them available to others. The webinar is also open for more general questions of research data management – with a focus on spatial data.

The seminar is organized by the domain specialists and research data advisers of the Swedish National Data Service (SND).

Date: 23 March at 11h00 - 12h00

**Job opportunity: Coordinator at the Bolin Centre for Climate Research**

The coordinator will be placed at the Department of Environmental Science (ACES), one of the partner institutions within the Bolin Centre, and among SU's biggest departments at the Faculty of Science with more than 170 employees.

The work will be conducted in close collaboration with the two co-directors of the Bolin Centre, the Bolin Centre research theme leaders, and the communication staff based within ACES and centrally at Stockholm University.

## Temporary positions at the Rossby Centre, SMHI

Rossby Centre at SMHI (Norrköping, Sweden) offers two temporary positions:

A short-term position until end of this year with the focus on investigating the effect of simulating lakes with the lake-model FLake in EC-Earth4 on climate.

Please find details [here](#) »

A 2-year position on applying machine learning methods for statistical downscaling of global climate model data.
